Add jobs to an employee's profile

This article is for:

ADMINISTRATORS

TIME & ATTENDANCE

In this article

Objective

Add jobs to an employee's profile

Objective

In Rippling, jobs are a mechanism to specify job responsibilities such as role, store location, task type, client, etc. They are used to

- Identify different job attributes (like store location, task type, client)

- Track employee hours by that pre-defined attribute

Once you have configured your job dimensions and jobs, you can assign them to employees using [job rosters](#) or add them manually to an employee's Rippling profile.

Add jobs to an employee's profile

To add jobs to an employee's profile, follow these steps:

1. Search for the employee in the Rippling search bar.
2. Select their name to open their Rippling profile.
3. Select the **Jobs** tab from the list on the left.

4. Select the **Job assignments** tab.
5. Click the **pencil icon** associated with the job dimension you want add the employee to.

Note: Depending on how your company's job dimensions are configured, your experience from this point on may vary. If the job dimension you want to add the employee to is configured so that assigned people have access to all jobs, rather than selecting specific jobs, you will specify whether the employee should be assigned to all jobs or no jobs.

6. Click to place a check mark next to each of the jobs you want to assign the employee to.
7. Click the **X icon** in the upper left to return to the employee's profile.
