Overview

Staying in the know about your employees' time approval deadlines is key to running payroll on time. To assist you with this, Rippling provides you with the following alert options:

- **Rippling default alerts:** These are provided by default by Rippling and cannot be edited. Learn more in this article that provides an [overview of time tracking alerts](#).
- **Customizable default alerts:** These are provided by default by Rippling, but they can be edited or removed. The customizable default alerts are:
 - **Missed clockout display:** An alert displays on the timecard when an employee works more than 12 hours consecutively at any pay rate.
 - **Unapproved hours:** An alert displays on the timecard when there are unapproved hours 3 days before the payroll run approval deadline at 2:30PM
- **Custom alerts:** Think of an alert as a custom workflow, powered by a trigger event plus one (or more) alert actions. You can create your own custom alerts from scratch. This is the primary focus of this article.

Note: Time tracking alerts are not sent for time entries created retroactively. They are intended to be real-time for clock-ins or clock-outs and will not trigger if created after the fact, such as when people self-report time entries.

Create a new custom time tracking alert

Note: This article provides instructions for the new Time Settings experience, which is currently available to a limited set of customers. If your experience does not match what is described, your account may not have been upgraded yet, and the button names and visuals may vary slightly. Learn more in this article, which provides an [overview of the new Time Settings experience](#).

To create a new custom time tracking alert, follow these steps:

1. From the main sidebar, select **Time**.

2. From the *Time* sidebar, select **Time Settings**.
3. In the *Attendance* section, click **Time tracking alerts**.
4. Click **New alert**.
5. Enter a name for the alert.
6. Click **Start** under *Alert trigger*.
7. Indicate the trigger that defines an event that will initiate an alert. For example, when there are unapproved hours 2 business days prior to the payroll run time.

Edit trigger

×

TIME ENTRY TRIGGERS Hours over threshold Days worked in period Weeks worked in period Before/after pay rate is triggered Missing breaks PAY PERIOD TRIGGERS Unapproved hours Underreported hours Unsubmitted timecard	Unapproved hours With the following trigger, you can set an alert for when employees still have unapproved hours prior to the payroll approval deadline. Trigger alert when an employee has more than 1 unapproved hour(s) 2 days prior to the payroll run approval deadline At 🕒 10:00 AM PDT
---	---

Back

Save

Note: Pay period–based alert triggers require workers to be on a pay schedule and paid through Rippling Payroll. Without this, the system cannot determine payroll approval deadlines, and the alert will not trigger.

8. Click **Save**.
9. Optionally, click **+ Add condition** to define filters if you want to narrow the trigger event to certain instances. For example, only for hourly, full-time employees.

Edit filter

Employment type

☐ Contractor / 1099

☐ Salaried, full-time

☐ Salaried, part-time

☒ Hourly, full-time

☐ Hourly, part-time

☐ Temporary / Intern

Back

Save

10. Click **Save**.

11. Click + **Add action**.

12. Select the action that should automatically be taken when the conditions are met.

For example, how the targeted audience of the alert should be notified, who the target audience is, and what the notification will say.

- **Send an email**
- **Send a mobile notification**
- **Display an alert on the timecard**
- **Escalate approval to someone else.** If you select this option, the escalated approver you specify will be able to approve the timecards, however, their name will not appear in the timecard approval flow, because approver names are driven by approval policies.

Note: With Rippling's notification preferences, users have the ability to customize how and when they receive notifications. Learn more in this article about [managing notification preferences](#).

13. Click **Save**.
14. Click **Add another action** if you want to add additional actions to this alert.
15. Click **Continue**.

You can add as many custom alerts as your company needs.

Edit an existing time tracking alert

Note: This article provides instructions for the new Time Settings experience, which is currently available to a limited set of customers. If your experience does not match what is described, your account may not have been upgraded yet, and the button names and visuals may vary slightly. Learn more in this article, which provides an [overview of the new Time Settings experience](#).

To edit an existing time tracking alert, follow these steps:

1. From the main sidebar, select **Time**.
2. From the *Time* sidebar, select **Time Settings**.
3. In the *Attendance* section, click **Time tracking alerts**.
4. Locate the alert you want to edit.
5. Click the expand arrow to display the alert's details.
6. Click the **pencil icon** next to the alert's name.
7. Click the **pencil icon** associated with the element(s) you want to edit (trigger, condition, and/or actions).
8. Make the necessary edits.
9. Click **Continue**.

Remove an existing time tracking alert

Note: This article provides instructions for the new Time Settings experience, which is currently available to a limited set of customers. If your experience does not match what is described, your account may not have been upgraded yet, and the button names and visuals may vary slightly. Learn more in this article, which provides an [overview of the new Time Settings experience](#).

To remove an existing time tracking alert, follow these steps:

1. From the main sidebar, select **Time**.
2. From the *Time* sidebar, select **Time Settings**.
3. In the *Attendance* section, click **Time tracking alerts**.
4. Locate the alert you want to remove.
5. Click the expand arrow to display the alert's details.
6. Click **Remove** in the alert's box.
7. Click **Yes, I'm sure** to remove the alert permanently.
